

HOME CARE FOR YOUR T-SHIRT

Place the wrapped fabric in a sunny spot, and let the dye process for at least 6-8 hours. For the brightest colors, you can let the dye cure for up to 24 hours.

Leaving the rubber bands on, rinse your T-shirt under cold running water. Then, continue rinsing in cool/lukewarm water while you remove the rubber bands.

Keep rinsing until the water runs clear.

Run your T-Shirt through a complete warm/hot washing machine cycle with detergent.

HOT TIP: Wash your tie dye T-shirt by itself for 2-3 washes, so the colours don't bleed onto your fav other clothes.
